Mark Tucker, AIA’s Group Chief Executive and President, said:

“AIA has delivered another strong performance in the first half of 2015. VONB growth is 25 per cent on a constant exchange rate basis, which more clearly reflects the underlying performance of the business during the recent period of foreign exchange volatility.

“Our disciplined approach to the management of our in-force business has enabled us to achieve a strong increase in IFRS operating profit and maintain our resilient solvency position. Our financial results continue to demonstrate the value of the consistent execution of our well-established growth strategy and our exclusive focus on the Asia-Pacific region.
“The region continues to present enormous growth opportunities for AIA. Ongoing urbanisation and rising disposable incomes, coupled with low provision of social welfare benefits, will continue to fuel the substantial and growing need for healthcare, protection and long-term savings products. AIA is exceptionally well-positioned to make the most of these opportunities.

“The Board has declared a 17 per cent increase in the interim dividend, a clear reflection of the health of AIA’s business, our strong financial results and our confidence in the future prospects for the Group. The power of AIA’s franchise, the breadth of our product range, our trusted brand and unrivalled financial strength will enable us to continue to generate sustainable value for our customers and shareholders.”
